1.7

GENERAL PRODUCT INFORMATION:

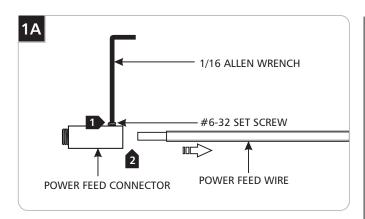

This product is suitable for indoor dry locations only.

Minimum volume of the electrical box must be 6 cubic inches (98 cubic centimeter).

NOTE: The remote transformer should be installed prior to these steps. Refer to the instructions provided with the remote transformer.

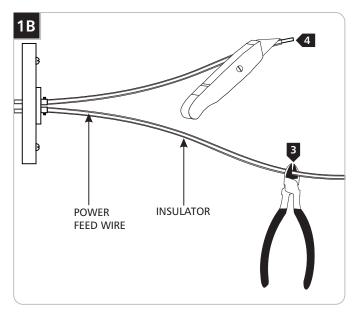

Resizing the Power Feed Wires

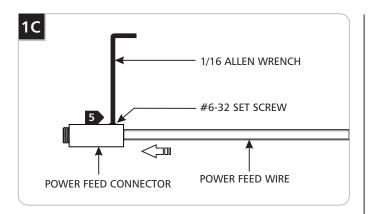

- Loosen (Do Not Remove) the #6-32 set screw on the power feed connectors with the 1/16 Allen wrench.
- 2 Remove the power feed connectors.

NOTE: To avoid electrical shorts, do not remove the clear insulator.

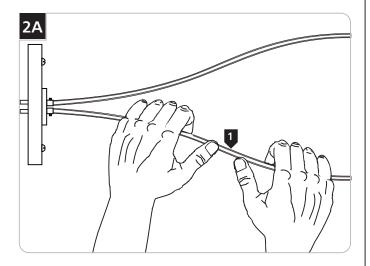

- 3 Cut the power feed wires and the clear insulators to the desired length with a sharp cutter.
- 4 Strip 1/4" end of the clear insulators for power connection with a sharp knife.

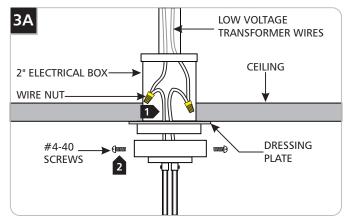

Feed the strip portion of the power feed wire all the way into the power feed connector hole and tighten the #6-32 set screw with the 1/16 Allen wrench. Repeat this step for the other power feed wire.

Shaping the Power Feed Wires

1 Bend the Power Feed wires to the desired shape with hands.

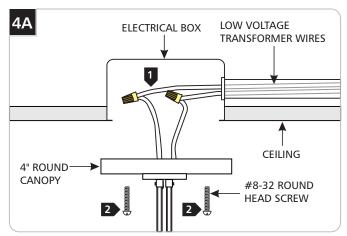

Install the 2" Square Power Feed Canopy

NOTE: 2" Electrical box should be installed prior to these steps. Refer to the instructions provided with the 2" electrical box.

- 1 Connect the power feed canopy wires to the low voltage wires coming from the remote transformer in the 2" electrical box with wire nuts.
- 2 Mount the 2" square canopy to the 2" electrical box with the two #4-40 screws.

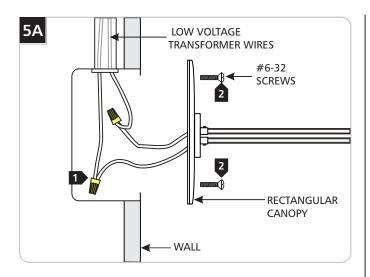

Install the 4" Round Power Feed Canopy

- 1 Connect the power feed canopy wires to the low voltage wires coming from the remote transformer in the electrical box with wire nuts.
- 2 Mount the 4" round power feed canopy to the electrical box with the two #8-32 screws.

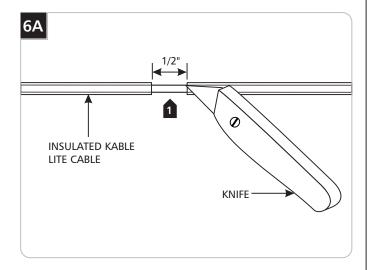

NOTE: Use the provided universal round crossbar when the canopy holes do not line up with the electrical box holes.

Install the Rectangular Power Feed Canopy

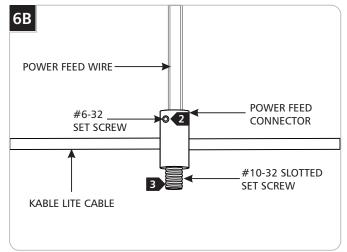

- Connect the power feed canopy wires to the low voltage wires coming from the remote transformer in the electrical box with wire nuts.
- Mount the rectangular power feed canopy to the electrical box with the two #6-32 screws.

Connecting the Power Feed Wires Directly to the Kable Lite Cables

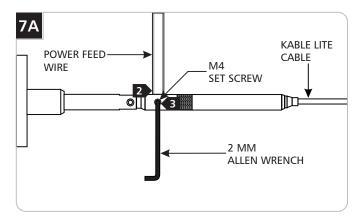

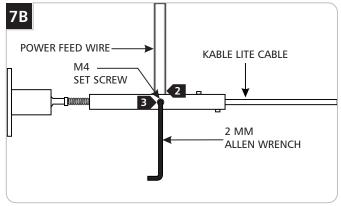

When using insulated Kable Lite cables, remove 1/2" of the insulation from each cables where the power feed connector is going to be mounted with a sharp knife. Make sure not to cut or nick the cable.

- 2 Unscrew the #10-32 slotted head screw from the tip of the power feed connectors with a screwdriver.
- Place the power feed connectors one onto each Kable Lite cable and tighten the #10-32 slotted set screw on the tip with the screwdriver tight.

Connecting the Power Feed Wires to the Turnbuckles

- Remove the power feed connector by loosening the #6-32 set screw with the 1/16 Allen wrench (refer to figure 1A on page 1).
- 2 Feed the uninsulated portion of the power feed wire, one for each turnbuckle, into the turnbuckle hole.
- 3 Tighten the M4 set screw with the 2 MM Allen wrench.
